DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “hooks extending from said edges substantially perpendicularly to a parting direction of said die in an as-molded state”, claim 1, “said nail projecting from said hook substantially in parallel with a parting direction of said die in an as-molded state”, claim 2, and “said hole penetrating through said hook substantially in parallel with a parting direction of said die in an as-molded state”, claim 3, and “said hooks extending inward from an edge of said opening substantially perpendicularly to a parting direction of said die in an as-molded state”, claim 5 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will

be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 8-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation of "one or more" constitutes alternative structure, contrary to statute. The use of—at least one—is acceptable.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 3612

6. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over either Komatsu Chemicals Co. Ltd or Fuji Heavy Ind Ltd, both cited by applicant.

7. Komatsu Chemicals Co. Ltd and Fuji Heavy Ind Ltd. have respective hooks 2, 27, thin hinges 3, 28, and are shown in an as molded condition, figures 4 and 5, with the hooks projecting approximately at 4:30 o'clock and vertically, respectively, with a hook nail projecting perpendicularly at the outer edge of the hook in figure 2 of Komatsu Chemicals Co. Ltd and at 27b in Fuji Heavy Ind Ltd. The die of Komatsu Chemicals Co. Ltd is easily designed to be movable in a parting direction of approximately 1:30 o'clock in figure 5 to part the molded product as the nail projects approximately parallel thereto, the exact angle being an obvious expedient to one of ordinary skill in this art. Similarly, a simple die to mold the product of Fuji Heavy Ind Ltd is easily constructed by one of ordinary skill in this art to part in a leftward direction in figure 5 as the nail 27b and the flange 27c both project in this direction with the hook projecting vertically. Thus both references do not require complex molds with undercuts.

Allowable Subject Matter

8. Claims 3-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. Claims 8-12 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

10. Claims 5-7 are allowed.

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fox et al., Bauer et al. and Ohkura et al. are cited to show bumper/fascia/grille connections.
